--SUMMARY OF THE INVENTION--

Please amend the paragraph beginning on Page 1, line 21 to read as follows:

--That object is attained by a lighting system having the features of claim 1 and a use of that lighting system as set forth in claim 9 a plurality of lighting units each possessing at least one light emitting device. The lighting units are connected to an output of a control device, wherein actuation of the lighting units is effected independently of each other by way of the control device. The lighting system may be used as an effect-producing illumination, for simulating a starry sky, for displaying information, or for marking localities. Advantageous configurations and developments of the invention are set forth in the appendant claims.--
